

Product Range

Tank · Heating · Water Technology

Professional equipment
and convincing solutions
for **tank**, **heating**
and **water technology**.

Tank – professional tank protection
and safe storage of fuel oil!

Tank protection systems:

- Leak detectors – sight glass principle
- Leak detectors for systems with liquid in the interstitial space
- Vacuum and pressure type leak detectors
- Inner tank linings
- Tank room linings
- Drip pans
- Alarm units for the detection of liquid accumulations and leaks
- Testers for tank servicing

Tank equipment:

- Mechanical and pneumatic level indicators
- Level controllers
- Level sensors
- Overfill prevention systems
- Withdrawal systems
- Anti-siphon valves
- Overpressure devices
- Vent caps
- Filler caps

- Our product portfolio for the safe operation of heating systems and fuel oil tanks reduces operating costs, helps make optimum use of fuels and provides timely warnings if hazardous situations arise.
- We provide a complete range from individual components to pre-assembled, tested assemblies.

- In addition to our comprehensive range of standardised, proven off-the-shelf products, we also offer customised special products.
- Many of our products help protect the environment. Our fields of activity include keeping the air clean, reducing energy consumption, protecting the groundwater and using resources carefully.

- The subject of saving energy in building technology applications has been our focus for almost 40 years. This comprehensive experience makes us a reliable partner with a powerful vision for OEMs and trade.

Heating – a complete range for the equipment of heating systems from a single supplier!

- Motorised boiler room vent and draft stabilisers
- Oil filters and fuel oil filters
- Boiler safety group assemblies
- Safety valves
- Connection assemblies for expansion vessels
- Thermal safety valves
- Combustion controllers
- Deaerators/Dirt separators
- Quick air vents
- Bypass valves
- Filling fittings
- Boiler water low level alarms
- Mixing valves and electric actuators
- Heating pump assemblies
- Solar pump assemblies
- Distribution manifolds for heating, cooling and geothermal systems
- Heating controllers and solar controllers
- Thermostat valves

■ From the start, we have supported the move towards geothermal and solar systems as well as the use of biogenous fuels by supplying professional components and assemblies.

National and international approvals and certificates ensure superior quality:

The labels shown apply only to specific AFRISO products.

red dot design award winner 2013

Water technology – the product range for drinking water supply and rainwater harvesting!

- Pressure reducers
- Check valves
- Radio-controlled water valve and water sensors
- Boiler safety equipment groups
- Safety valves
- Sacrificial anodes
- Drinking water filters
- Domestic water system centre
- Rainwater system centre
- Rainwater filters
- UV rainwater disinfection systems
- Inner tank linings for rainwater harvesting systems
- Oil tank conversion kits

The company

AFRISO, founded by Adalbert Fritz in Schmiedefeld, Germany in 1869, is an innovative, medium-sized company with a total staff of 1,000 worldwide, 500 of which are employed at the five German sites.

Traditionally, we manufacture measuring and control devices for temperature and pressure. For more than 50 years now, we have also been manufacturing measuring, control and monitoring devices and systems for environmental protection:

- Level indicators
- Overfill prevention systems
- Leak detectors
- Fittings for heating systems
- Flue gas analysers

Headquarters in Güglingen

Our leading-edge, market-oriented products and innovations result from our comprehensive know-how, a highly motivated and qualified staff and the fact that we understand what the market needs.

Our portfolio covers everything from a comprehensive range of standardised, proven off-the-shelf products all the way to high-grade customised solutions.

- Research and development
- Tools and equipment making
- Highly versatile and rational production
- Highest quality levels
- National and international approvals

AFRISO stands for leading-edge brand products to meet your requirements.

Environmental management as per ISO 14001 is a matter of course for AFRISO.

Your advantages – our strengths

Wide ex-stock product range

- More than 2,000 different product types with more than 750,000 instruments are available for ex-stock delivery.

Global sales network

- Competent sales partners offer you optimal technical and economic solutions.
- Our External Sales Engineers will advise you personally and individually.
- Our Sales and Distribution Companies guarantee a worldwide service.

Service and customer care

- Quick and reliable local service.

Strong research and development

- Innovative product development.
- Customised special products according to your requirements.

The complete range of products: Measuring, control and monitoring technology for domestic, industrial and environmental applications.

- Level indicators and level controllers
- Overfill prevention systems
- Leak detectors, leak monitoring systems
- Inner tank linings
- Gas alarm units
- Equipment for fuel oil storage tanks and oil carrying pipes
- Equipment for boilers, boiler rooms and chimneys
- Equipment for drinking water supply and rainwater harvesting
- Heating controllers, solar controllers
- Fittings for heating, refrigeration, air conditioning and hydraulic balancing
- Smart Building Systeme
- Temperature measuring instruments and temperature controllers
- Pressure gauges and pressure controllers
- Portable measuring instruments and testers
- Portable and stationary gas analysers
- Signalling devices/display units
- Monitoring and communication systems
